

Assignment 3.1.1 Operating Systems

Indicate whether each of the statements below is TRUE (T) OR FALSE (F).

Make sure to ask for help at any time.

1. The operating system manages the computer's memory and processes. ____
2. Only one application or program can run at a time on most personal computers. ____
3. If you buy a new personal computer, you will need to install the operating system yourself in most cases. ____
4. Most personal computer operating systems use a graphical user interface. ____
5. The Microsoft Windows operating system was first developed about 10 years ago. ____
6. Mobile devices like smart phones use operating systems specially designed for them. ____
7. Microsoft Word is the most important program on a personal computer. ____
8. Viruses (programs that cause issues for your computer) are specific to a particular operating system.
(That is, a virus that attacks Windows would probably not attack a MAC operating system.) ____
9. Icons are used to communicate feelings in e-mail and social media posts. ____
10. If you want to install an application on a personal computer, you must ensure that it is compatible with your operating system. ____
